

BELO SHABONO PRESENTS

Amazon Humanitarian Journey

Global Travelers E-Club
March 13th to March 19th, 2027

An unforgettable experience with
Nature, Connection & Transformation

BELO SHABONO
AMAZON CRUISES

Shabono is a word in Yanomami language,
and it means "our home in the forest".

Foto: Carol Caminha

BELO SHABONO
AMAZON CRUISES

Welcome to the Shabono Amazon Experience, an unforgettable experience aboard the beautiful and charming Belo Shabono boat.
Built in 2017, the Belo Shabono boat is 26 meters in length and 7 meters in width. It is the work of Amazonian artisans, with an authentic regional, vintage style.

Sailing through the Negro River's waters, in the Brazilian Amazon, the Shabono offers a magnific floating glamping experience, providing an authentic connection with the exuberant Amazonian nature and culture.

Program

03/13 SATURDAY

ARRIVAL IN MANAUS: A Belo Shabono team member will be at the Manaus airport waiting for your arrival.
Our representative will be wearing an official t-shirt and will be holding a Belo Shabono identification sign.

There will be a private transfer for you from the airport to the hotel.

Check-in at the hotel.

Good night!

Program

03/14
SUNDAY

Breakfast at the hotel's restaurant.

10a.m. - Departure from the hotel for a city tour in Manaus.

We will get to see the Amazonas Opera House, the São Sebastião Square, which is located in front of the Opera House, and the historical Adolfo Lisboa Market located in front of the Rio Negro River.

Lunch at the local restaurants.

In the afternoon we will visit the MUSA (Amazon Museum).

Return to the hotel in time to relax by the pool.

Dinner.

Good night!

Program

03/15 MONDAY

Breakfast at the hotel's restaurant.

09a.m. - We will check out from the hotel and board the private transportation which will take us to the Marina Tauá's pier, where we will come aboard the Belo Shabono boat.

Then, we will start navigating, heading south, down the Negro River, passing in front of the city to see the old dock, the fish market, and the simplicity of the stilt houses, home to the natives that live by the river, until we finally get to the meeting of the waters of the rivers Negro and Solimões, that together form the Amazonas River - one of the most beautiful and natural phenomena of the Amazon region!

Lunch will be served on the restaurant boat.

Next, we will head north to visit the Janauari Ecological Reserve, its villages and floating houses, and see its beautiful birds. Here, we will have the opportunity to see a little of the day-to-day activities and the life of the "caboclo" people, who live on the waters of the Amazon. And if we're lucky, we will see the memorable "queen of the lakes", the giant lily pads - a symbol of the Amazon.

Dinner will be served on the boat.

Today, we will already spend the night at the Negro River, where the lights of the city of Manaus can no longer be seen. The boat is anchored, every night, in beautiful lakes or streams, safely protected and off the main course of the river.

Program

03/16 TUESDAY

Breakfast will be served on the boat.

Fantastic visit to an Indigenous community from the Amazon - the Dessana. You will have the opportunity to experience a little of the day-to-day life of the true people of the forest! We will watch a ritual presentation in which the Indigenous present using their musical instruments, built with materials from the forest. After the presentation, you will also have the opportunity to interact with the Indigenous and will be able to try facial painting with a dye that is made with pigments extracted from the trees of the forest and get to know their residence (maloca) and how the Indigenous lives. You will also visit the community Art Gallery and the House of Medicines from the Forest.

Return to the boat, where we will continue sailing up the Negro River.

Lunch will be served on the boat.

We will board our motorized canoes and sail the streams looking for birds and local animals, such as the little monkeys, in their natural habitat.

Right next, we will arrive at one of the Amazon paradises where we will be enchanted: the Anavilhanas Archipelago, the second-largest freshwater archipelago on the planet.

At the end of the day, we will have the opportunity to enjoy the sunset having some drinks on the deck of the boat, and/or do some water activities (stand-up paddling and kayaking).

Right after dusk, we will board our authentic, regional motorized canoes again and sail through the streams for an exciting alligator night-spotting adventure.

Dinner will be served on the boat.

Program

03/17
WEDNESDAY

Good morning!
Today, we will try a new adventure: fishing the famous Amazon piranhas! We will depart very early aboard our motorized canoes toward the flooded forests or streams with our fishing poles.

Breakfast will be served on the boat.

Visit to the Manioc Flour/Tapioca/Açaí House, where we will have the chance not only to observe the plants/trees of these foods but also the manufacturing process of the flour and the tapioca.

Lunch will be served on the boat.

Next, we will get to see the Acajatuba Lake region, where we will visit a beautiful and typical village of Amazonian people (ribeirinhos), with time to experience a little of the day-to-day lives of the people of the forest and do some community service.

At the community, you will also have the chance to visit a souvenir store with handmade crafts done by the community.

Visit to the Turtles of the Amazon Project at the Sustainable Development Reserve Rio Negro (RDS Rio Negro). A beautiful and important project for the protection of Amazonian chelonians. Each participant will have the opportunity to release a baby turtle in the Negro River.

Return to the boat in time for a drink.

Dinner will be served on the boat.

Program

03/18
THURSDAY

Breakfast will be served on the boat.

We will sail toward the Amazon Pink Dolphin Environmental Education Project. The project is monitored by IBAMA/ICMBio (Brazilian government environmental organization). You will have the chance to observe the pink dolphins in the water and see them while they are fed by one of the project's monitors. Amazing!

Lunch will be served on the boat.

Visit one more local community for community services.

At nightfall, sailing north of the Rio Negro, we will reach our destination to anchor the boat in a paradisiacal region of lakes and igarapés (small rivers) inhabited by beautiful and exotic birds and charming pink dolphins from the Amazon.

Dinner will be served on the boat.

After dinner, we will have a chat about the legends of the Amazon.

Program

03/19
FRIDAY

Breakfast will be served on the boat.

Next, each participant will be invited to plant a tree in the Amazon, helping to protect the greatest tropical forest on our planet.

We will sail down the Negro River toward the city of Manaus.
The arrival time at the Marina Tauá's pier depends on the departure flight. Our private transportation will be waiting to take you to Manaus airport.

Thank you! See you on our next adventure!

Nature & Culture

ABOUT THE BRAZILIAN AMAZON

The Amazon occupies more than 40% of the national territory, and it is formed by different ecosystems. Considered to be one of the three large tropical forests of the world, the Amazon's biodiversity is unmatchable: there are about 30 million of species of animals and the richest collection of plants on the planet.

A lot is said about the Amazon's fauna and flora, but there is an even greater richness: the cultural one. Among the Amazonian people, there are people who live in the cities, the ribeirinhos (people who live on the river margins) and 170 indigenous people, with hundreds of different languages and varied culture.

Even if it is our most preserved biome, according to the Brazilian Institute of Forests, about 16% of the Amazon has already been devastated. That is equal to 2 and half times the area of the São Paulo state.

BELO SHABONO
AMAZON CRUISES

Nature

ABOUT THE NEGRO RIVER

The greatest affluent on the left margin of the Amazonas River, the Negro River has a 2.253 kilometer extension and it is the seventh greatest river of the world in water volume. In Colombia, where the river originates, it is called the Guainia River. After is has passed through Manaus, it combines itself with the Solimões River, and it is then, when they meet, that the Amazonas River is born. The Belo Shabono Expedition includes visitation to some of the communities that exist along the margins of the Negro River, especially in the Negro River's Sustainable Development Reserve (RDS Rio Negro). For these people, beyond their livelihood, the river is also an important way of transportation for commerce and tourism, and it is also how children and young adults get access to schools and universities.

Curious fact: due to the high acidity of its waters, insects can't proliferate in the Negro River. Therefore, there are almost no mosquitoes in the region. This is great news to anyone who joins the Belo Shabono Expedition!

CONNECTION

CIPIÁ INDIGENOUS COMMUNITY

Located at about 80 kilometers from Manaus, close to the Tupé's Development Reserve, the Cipiá indingenous community is a result of the union of six ethnicities: Dessana, Tukano, Tuyuca, Makuna, Baré and Kubeua. Its representatives communicate through a single language: Tukana.

At the Cipiá indingenous community, we will meet its inhabitants and get to live an experience that involves storytelling, arts, dancing and music.

Tribe Chief Domingos Dessano

ABOUT THE NEGRO RIVER SUSTAINABLE DEVELOPMENT RESERVE

The Negro River Sustainable Development Reserve (RDS Rio Negro) was created in 2008, and it has a total area of 103.086 hectares. About 600 families live in the reserve, which is located in the Amazonas state, in the cities of Manacapuru, Iranduba and Novo Airão.

A Sustainable Development Reserve (RDS) is a natural area which is home to traditional people who live under systems of sustainable exploitation of natural resources. By protecting the use of the environment developed along generations and adapted to the local ecological conditions, this category of conservation unit of sustainable use contributes to the protection of nature and the maintenance of biodiversity. The goals of the RDS units are to assure the necessary conditions for the reproduction and improvement of the ways of life of the families which live in them, including when it comes to the exploitation of natural resources. Besides, they aim to value, maintain and perfect knowledge and techniques for environmental handling which are being developed by these people.

CONNECTION

ABOUT THE OUR LADY OF PERPETUAL HELP VILLAGE

The Our Lady of Perpetual Help village, located in the Acajatuba lake region, in the city of Iranduba, is located at the right margin of the Negro River. Together with another 18 communities of people who live by the margins of the river, it is part of the Negro River Sustainable Development Reserve (RDS Rio Negro).

Founded in 1976, the community relies on commerce to bring its main source of revenue. Surrounded by natural Amazonian beauties, the village is made up of warm and talented people, with special attention to its local artisans.

A few years back, the community was one of Rede Globo's chosen filming sets for the nationally famous soap opera 'A Força do Querer', written by Glória Perez.

Sustainability

We are guided by the respect toward people, entrepreneurship that impacts social life and the sustainable management of natural resources.

BELO SHABONO
AMAZON CRUISES

We have reached the mark of more than 20 thousand trees planted by our expeditions' clients.

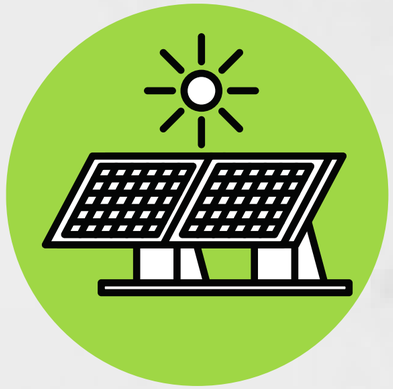

We perform waste management in all of our trips, and we provide advice to local communities through where we pass so that they can do the same. All recyclables is forwarded to the nearest possible waste management center.

All of our trips are plastic-free.

BELO SHABONO
AMAZON CRUISES

Renewable energy minimizes the impact of climate change. That is why we have implemented clean energy, especially solar energy, in our expeditions. We support and encourage our partners to do the same.

We implement technology to reduce the noises of all our equipments and vehicles, whether in urban trips or in nature. In the Belo Shabono boat (Manaus/AM), the engine's encapsulation promotes up to 75% noise reduction. Our motorized canoes have electrical engines.

BELO SHABONO
AMAZON CRUISES

We create true relationships with continual support to the traditional communities which we visit. We worry about supporting entrepreneurial initiatives to strengthen local leaders and professionals so that they can preserve their culture and keep their communities alive, dynamic and healthy.

We perform professional capacitations and support the communities' initiative projects, among which is the Turtles of the Amazon Project, located in the Negro River Sustainable Development Reserve (RDS Rio Negro).

We give orientation and support the revitalization of traditional art, among which are music, dancing and painting. More recently, we have supported the creation of the Cipiá indigenous community's art gallery, located in the Negro River Sustainable Development Reserve (RDS Rio Negro).

Checklist

BELO SHABONO
AMAZON CRUISES

All year round, the weather in the Amazon is hot and wet, with cooler nights.
During the Belo Shabono expedition, you don’t need to worry about mosquitoes due to the Negro River’s acid waters.
However, we recommend that you put on insect repellent when you go for a hike in the forest, and also during the other activities on land.

Be sure to bring comfortable clothing and shoes with you. You can find a checklist suggestion below with the main recommended items:

· Sunscreen;
· Insect repellent;
· Shorts;
· Walking/running shoes and/or boots for trekking (used only for trekking in the forest – we recommend that you bring two pairs, in case one of them gets wet);
· High socks for the trekking;
· Flipflops (They will be your main shoe type during the expedition);
· Hat;
· A sweatshirt for cooler nights;
· Swimsuit for swimming and water activities;
· Sunglasses;
· Books for reading (we also have a mini-library on the boat);
· Medication you take regularly;
· Be prepared to bring cash with you! The communities which we will visit don’t accept debit/credit cards. The Brazilian currency is the Brazilian Real, or BRL. There are ATMs available at the airport and in the city of Manaus only.

Thank you!
